E.S.C.O.T. Europe

EUROPEAN SCIENTIFIC COMMITTEE ON. THERMALISM

Welcome to the E.S.C.O.T. – EUROPE website and to the Competition for the European Schools of higher secondary education, the most important in Europe for number of participants, schools enrolled and Countries involved.

The site has been specifically developed to allow twinned European schools, which are taking part in the Contest "Guide to the European Health Resorts", to compete on equal terms (with the same tools).

On this site, about 20,000 students and teachers will be working on the restricted area only for schools.

In the European Meeting Point more than 200,000 students will have the chance to meet, socialize and make friends with other European students and their teachers. Finally, through local administrations, as many as 40,000,000 Europeans will be involved in supporting our youths' work.

Thanks to this modus operandi, we will all together be able to give our contribution to laying the foundations on which the European Union should be built: the European Citizens.

ACQUE TERMALI

Docenti Referenti: G. Ciani
Classi interessate: 2AS, 3AS

Il sito web di riferimento del progetto che vede coinvolte scuole di 10 paesi europei è: <http://www.escot-europe.eu/home.php>
I lavori pubblicati costantemente dagli studenti coinvolti è visibile qui: <http://www.escot-europe.eu/percoto/index.html>
